

# FE/4C S

## Long loaf moulder

The 4-cylinder FE/4C S long loaf moulder is particularly suitable for processing dry and elastic dough and it is mainly used for automatic industrial lines by coupling it with ECP intermediate proofer.

### Standard features

- Painted steel outer paneling and structural frame on casters.
- Double painted anti-corrosion cycle and epoxy powder coating ( suitable for food contact).
- Loading conveyor belt pre-arranged to be coupled with ECP intermediate proofer.
- 4-cylinder dough lamination and adjustable opening.
- Pre-rolling up mesh to prepare dough pieces for next long moulding through 3 stainless steel adjustable and interchangeable pressing devices and polyethylene-coated sides suitable for food contact as well for moulding of cut-off end-shaped loaves.
- Performances: dough pieces ranging from 100 to 1600 g; length of loaf: 150 – 200 - 380 mm.
