

Rotating rack oven

EF-R is a rotating rack oven with gas or electric power designed for bakeries and pastry shops.

Capacity

- 1 rack for baking pans mm 400x600 (swivel but not removable) or with 9 decks (swivel and removable).
- Pitch between the trays: cm 8.

Construction

- Internal/external construction in stainless steel
- Extractor hood (not motorized)
- Stainless steel door with glass 12 mm thick and screen-printed outer glass.
- Control panel with digital thermostat and digital timer for baking time
- Steam generator
- Mounted on stainless steel electric cell or on open stainless steel support stand
- In the gas version, intake air atmospheric burner (rear access on the right)
- The high efficiency combustion chamber allows low operating consumption and considerable energy savings. Its structure favors an optimal exploitation of the heat exchange ensuring long lasting over time.

Option

- Motorized exhauster for hood
- Digital board with 29 baking programs
- Open support stand in stainless steel
- Electric leavening proofer in stainless steel
