

BAKE UP

Electrical deck oven

The BakeUp is a compact oven suitable for direct cooking on stone or in a tray. Maximum operating temperature: 400°C. Front, door, and ergonomic handle are made of stainless steel. Heat-resistant glass-ceramic door glass. Radiant aluminized sheet metal chamber, with high-performance thermal insulation made of ceramic fiber and rock wool. 14 mm thick refractory cooking surface or embossed sheet metal (optional) for pan cooking. Direct exhaust vent. Internal lighting: halogen lamp.

Features

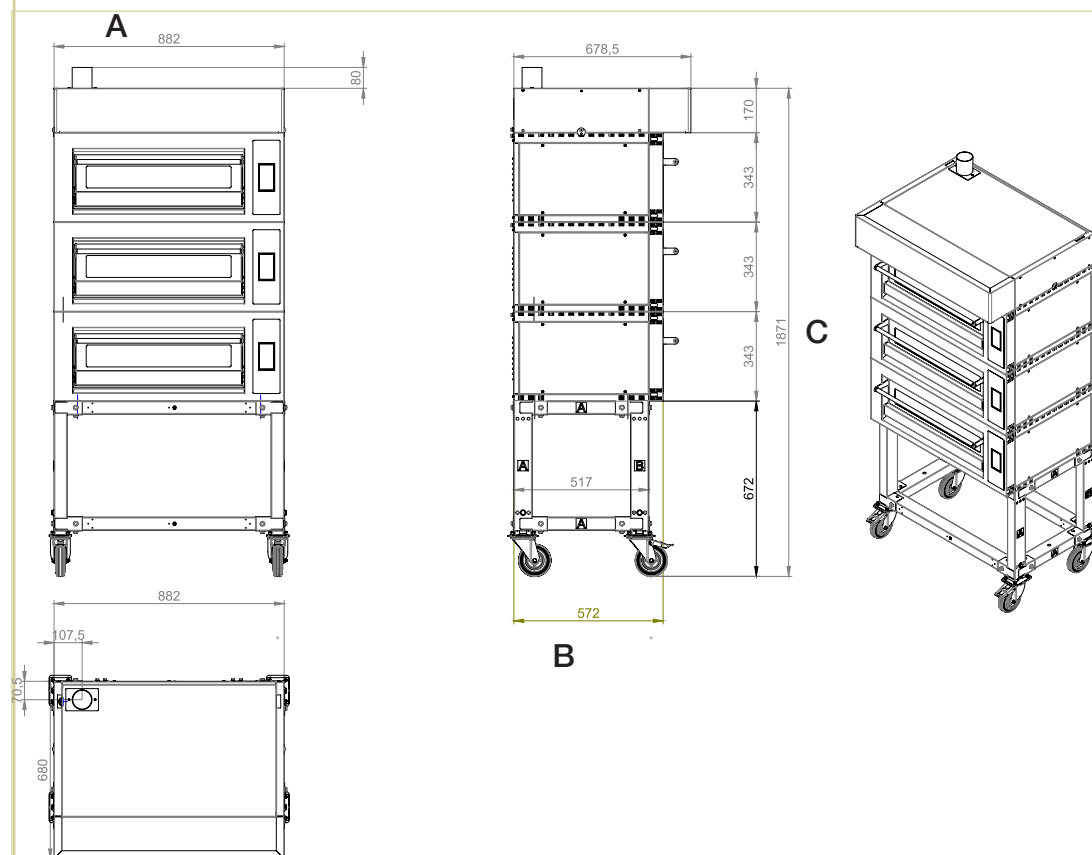

Thanks to the innovative technology of a patented device, it features Baking Assistance and Initial Heating functions; while the former adjusts the oven's performance based on the required productivity, the latter optimizes the heating phase each time it is turned on for the first time.

Functioning

- The TOUCH control panel allows you to select all parameters directly from the associated icon; it offers the following functions:
- Scheduled start;
- 2 baking timers;
- Pyrolysis cleaning program;
- ECO function (optimizes power consumption, maintaining the oven temperature during pauses);
- 10 customizable programs.
